Oracle ERP Cloud

Consulting & Managed Services for Oracle Fusion Applications

ennVee has worked extensively with Oracle's Fusion Applications since its 2010 inception. As a systems integrator in Oracle's Early Adopter program, ennVee was the first SI to bring Fusion Financials live for any Oracle customer in the world.

We help clients deploy Fusion ERP, HCM and CRM using a SaaS, hosted, on premise model, and can also deploy Fusion using a hybrid approach where a component of Fusion applications co-exists with core EBS, HCM, or CRM.

Applications Strategy Assessment

We generate a fusion roadmap and business case that aligns to your organization's technology and business agents.

Application Management & Support

ennVee support teams are dedicated Oracle veterans with deep hands-on experience providing support for Oracle Fusion, E-Business Suite, and PeopleSoft applications to companies across all major industries. We offer three levels of 24x7 support to Fusion Applications from our on-shore, off-shore, or a hybrid of both.

Differentiators

We have been implementing SaaS products for nearly a decade and leverage this experience to fine-tune our Fusion implementation methodology. In recognition of our expertise in Fusion Applications and Cloud-based system implementations, ennVee was by Oracle to provide guidance to their sales staff in preparation for the launch of Fusion ERP Cloud services.
