Oracle Human Capital Management
Consulting Services & Solutions

Overview

Oracle Fusion HCM's user-centric design provides value to every individual across the organization — from HR Professionals, to employees and managers. Whether you opt for a single module or the entire suite, ennVee can help foster HCM co-existence with your current applications to deliver innovation without disruption.

ennVee's HCM practice is built on the fact that traditional HR tasks are unique to each organization. We adopt specific modules from Oracle Fusion HCM and harmonize them with your current Oracle E-Business Suite installation.

Recommendations & Insights

Oracle Fusion HCM provides several integration methods to meet your business needs, from packaged integrations to delivered interfaces for Payroll and Benefits providers, to an integration platform based on Oracle Fusion Middleware and a comprehensive set of tools, templates, and pre-packaged integration to cover various scenarios using modern and efficient technologies. This also allows integration to any current HCM installation.

Oracle implementation combines the breadth and depth of end-to-end solutions covering core HR, workforce management, workforce rewards, as well as workforce optimization, and workforce analytics with ease and speed of cloud delivery. Having the visibility to identify potential problems before they occur and take immediate action will increase morale, save money, and boost your competitive edge.
